

Informational Bulletin

Thank you to all who came in support of the Fire Prevention Code is on January 26, 2010 in Hartford at the Legislative Office Building. We had approximately 25 uniformed personnel present at the hearing. As the story goes the Fire Prevention Code was rejected at the hearing due to some administrative issues/concerns that were brought up and we did not have the opportunity or need to speak. The Fire Prevention Code Committee is meeting to address these concerns from the hearing and have a plan on how to move forward once again. An in depth committee report will be given at the C.F.M.A. February meeting. For those who came in support it was not for nothing, your presence was noticed by the committee. We will once again ask for your support in the near future to again come to the LOB and support the Connecticut Fire Prevention Code. We are getting closer and closer don't give up the fight!

For those of you planning on attending the association meeting be sure to call in so we have enough seating to accommodate all

The next association meeting has been graciously sponsored by
